

# Celery

## Victoria F1

Hybrid

### General Description:

This is the UK's market leader for early and mid-season celery production. This variety is mid green colour, tall with fleshy petioles. This quick growing hybrid has good standing ability, is slow to bolt from early plantings and performs well under difficult spring conditions. Victoria is one of the best flavoured celery varieties available.

### Profile

<b>Maturity Slot:</b>	Early/main season	<b>Petiole colour:</b>	3
<b>Height to 1st knuckle (cm):</b>	30	<b>Petiole texture:</b>	2
<b>Resistance to bolting:</b>	4		

<b>Comments:</b>	Industry standard in UK, main markets Northern Europe, Canada/New Zealand
------------------	---

### Key

Petiole colour:	1 = v. pale	5 = dark green
Petiole texture	1 = v. ribby	5 = v. smooth
Resistance to bolting:	1 = low	5 = high

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.

## Remus F1

Hybrid

### General Description:

This is our newest introduction for early and main season cropping to run alongside Victoria. Extensive UK trials have shown this variety to be quick to mature and gain weight early in the season and often slower to bolt than Victoria. With similar colour and texture to Victoria as well as excellent eating qualities we believe this variety will be a great addition to our range.

### Profile

<b>Maturity Slot:</b>	Early/main season	<b>Petiole colour:</b>	3
<b>Height to 1st knuckle (cm):</b>	28	<b>Petiole texture:</b>	3
<b>Resistance to bolting:</b>	4		

<b>Comments:</b>	Main market is Northern Europe, quick maturing in the UK
------------------	--

### Key

Petiole colour:	1 = v. pale	5 = dark green
Petiole texture	1 = v. ribby	5 = v. smooth
Resistance to bolting:	1 = low	5 = high

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.

# Celery

## Octavius F1

Hybrid

### General Description:

A mid green hybrid, medium height, bold and high yielding. Good results in late season. Sweet flavour. Can also be used for greenhouse production.

### Profile

<b>Maturity Slot:</b>	Late season/Glass house	<b>Petiole colour:</b>	3
<b>Height to 1st knuckle (cm):</b>	27	<b>Petiole texture:</b>	2
<b>Resistance to bolting:</b>	3		

**Comments:** Main markets Northern & Southern Europe. Flexible variety, high yields, field and glass house production

### Key

Petiole colour:	1 = v. pale	5 = dark green
Petiole texture	1 = v. ribby	5 = v. smooth
Resistance to bolting:	1 = low	5 = high

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.

# Celery

## Monterey F1

Hybrid

### General Description:

This variety performs well in Southern Europe and is the market leading variety in Spain. It is a dark green vigorous variety. Attractive, very fleshy tight sticks hold well in the UK in autumn.

### Profile

<b>Maturity Slot:</b>	Early/main season	<b>Petiole colour:</b>	3
<b>Height to 1st knuckle (cm):</b>	30	<b>Petiole texture:</b>	3
<b>Resistance to bolting:</b>	3		

**Comments:** Industry standard variety in Spain  
Main market Southern Europe

### Key

Petiole colour:	1 = v. pale	5 = dark green
Petiole texture	1 = v. ribby	5 = v. smooth
Resistance to bolting:	1 = low	5 = high

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.

## Celery

# Hadrian F1

Hybrid

### General Description:

Hadrian is the newest darker green celery variety showing good height and excellent weight in trials in Europe and USA. During the early sowings it has shown intermediate tolerance to bolting, and in the summer is less prone to producing side shoots than other varieties. Extensive trials are continuing across Europe and the USA where it shows good resistance to Fusarium

### Profile

<b>Maturity Slot:</b>	2nd Early/Main	<b>Petiole colour:</b>	4
<b>Height to 1st knuckle (cm):</b>	30	<b>Petiole texture:</b>	3
<b>Resistance to bolting:</b>	3	<b>Resistance to Fusarium:</b>	HR

### Key

Petiole colour:	1 = v. pale	5 = dark green
Petiole texture	1 = v. ribby	5 = v. smooth
Resistance to bolting:	1 = low	5 = high

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.
