The taste of innovation

Purple Sprouting Broccoli

Red Fire F1

HYBRID

General Description:

This outstanding winter hardy variety produces uniform, erect plants which mature from the end of January to start of March depending upon the sowing date and location. The stems are easy to pick with excellent colour and medium to large heads with 8-15cm stem diameter. It is generally best programmed for one main pick with a follow-up secondary pick after 10 days giving average yields of 300-350g per plant. Therefore we would suggest at least two sowings to extend the cropping period of this excellent variety.

Profile:

Type:	Hybrid
Plant uniformity:	Good
Cropping Period:	February / Mid-March
Days to Maturity:	130 days approx
Spear Colour:	Dark Purple

The information that has been provided is an average of the data gathered from various trial locations. Please be aware that variations in the growing environment and climatic conditions can render this information inaccurate, it is intended for general guidance only.

Purple Sprouting Broccoli

Red Admiral F1

HYBRID

General Description:

Our first hybrid introduction, Red Admiral is best suited to cropping in mid- November to end of December. The vigorous plants produce prolific high quality spears with small heads ideal for the premium pre-pack market. The spears are medium sized, dark purple and have excellent texture and flavour. Red Admiral can be cropping over a reasonably long period and will yield average weights of 200-300g per plant depending upon time of year, location and season.

Profile:

Type:	Hybrid
Plant uniformity:	Good
Cropping Period:	Mid-November - December
Days to Maturity:	Approx. 130 days
Spears Colour:	Dark Purple
